LONDON, Aug. 4, a. m .- The News and Times LONDON, Aug. 4, B. III.—The News and Plates and City Articles say the advance in back raties was not anticipated in the Stock Exchange, and consequently caused another general decline in prices. Last night's bank returns show it had become necessary and the extremely sadden and unfavorable turn in the weather, which will be likely to lead to grain importations must have furnished an additional inducement.

It is also believed that a further remittance of gold to Spain may remain to be made. In connection with the recent loan of £1.000,000 granted that country, but London firms otherwise assert that there is no reason to anticipate any increase of pressure, since it appears the current demand for money has been chiefly for internal circumstance, the amount of notes now in the hands of the public being at least half a million in excess of the total usual at this season. The demand at the Bank vesterday at the altered rate was moderate.
